Umsetzung, Beratung und Content-Akquise an der Universität Konstanz

André Hoffmann, Bibliothek der Universität Konstanz

Überblick

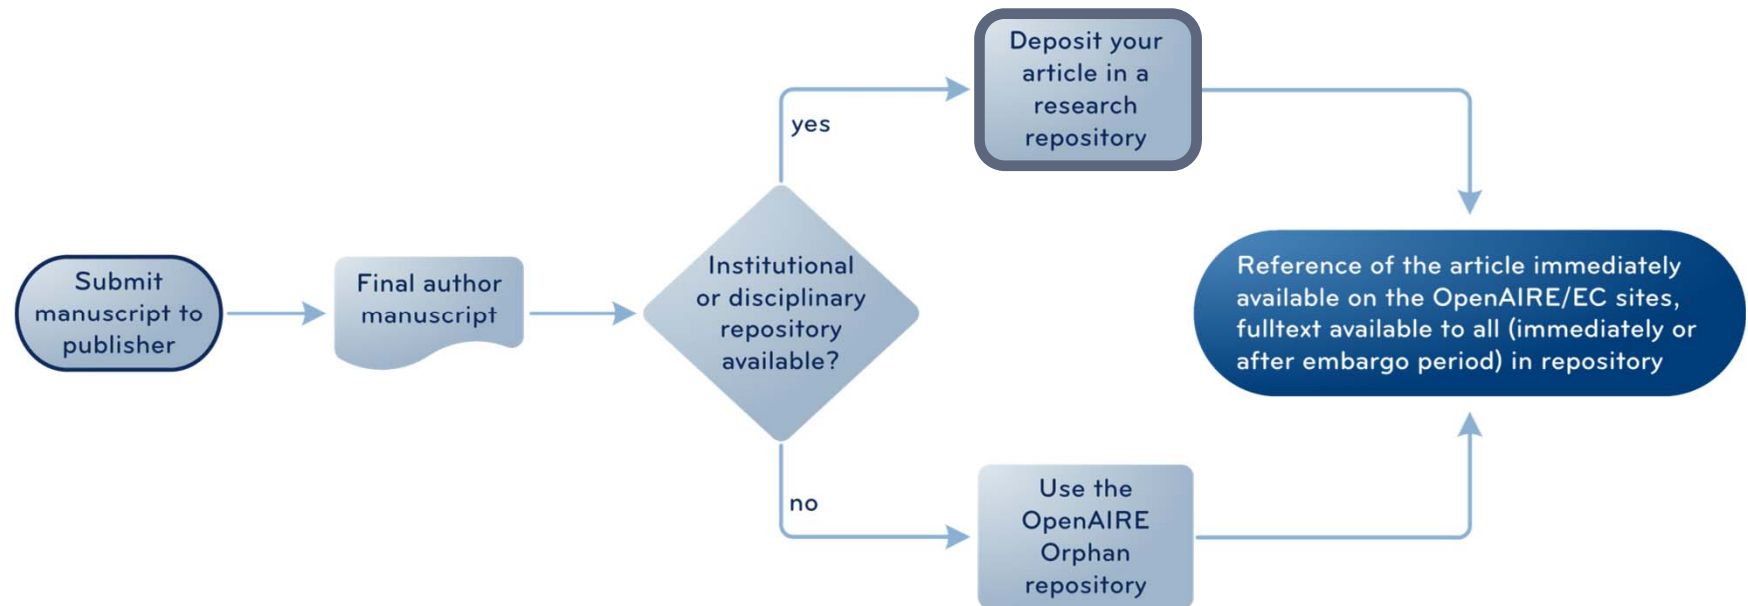

- OpenAIRE Compliance (Anforderungen erfüllen)
- Content-Akquise
- Best Practice

Wie können die Anforderungen erfüllt werden?

Publikations- und Einstellungsworkflow

Zentrales Anliegen

- Publikationen aus FP7-Projekten sichtbar machen
- Durch die Umsetzung der Guidelines, die eine technische Mindestanforderung an ein Repository darstellen, wird das institutionelle Repository zum zentralen Einstiegspunkt für Forscher, um ihre FP7-Publikationen zu veröffentlichen

Was Sie tun können:

- Wissenschaftler/innen informieren und aktivieren und sie bei Rechtsfragen unterstützen
- Ein Repository zur Verfügung stellen und die OpenAIRE Richtlinien umsetzen (Compliance)
- Publikationen aus EU-Projekten identifizieren, durch Recherchen Beziehungen zwischen Projekten und Publikationen herstellen, Rechte prüfen und Wissenschaftler/innen bei der Einstellung unterstützen
- Metadaten im Repository entsprechend ergänzen und diese mittels eines OAI-PMH-Sets für das Harvesting bereitstellen

OpenAIRE Guidelines

18 NOVEMBER 2010

The OpenAIRE Guidelines will provide orientation for repository managers to define and implement their local data management policies in compliance with the Open Access demands of the European Commission. Furthermore they will comply with the technical requirements of the OpenAIRE infrastructure that is being established to support and monitor the implementation of the FP7 OA pilot and ERC Guidelines for Open Access. By implementing these Guidelines repository managers are facilitating the authors who deposit their publications in the repository, in complying with the EC Open Access requirements.

For developers of repository platforms the Guidelines provide guidance to add supportive functionalities for authors of EC funded research in future versions. The OAI-Extended add-on for DSpace, compliant with these Guidelines are available [here](#).

The current version 1.1 of the OpenAIRE Guidelines is available in the following languages:

- [EN - OpenAIRE Guidelines 1.1](#)
- [ES - Directrices OpenAIRE 1.1](#)
- [PT - Directrizes OpenAIRE 1.1](#)

OpenAIRE would like to receive comments on the Guidelines, and experiences with the implementation of them. Please send all your feedback to Marnix van Berchum and Eloy Rodrigues.

- ### 1 Register your repository in OpenDOAR

The first step is to register your repository in [OpenDOAR](#). OpenDOAR is an authoritative worldwide directory of academic open access repositories.

If you are already registered in OpenDOAR, proceed to Step 2.
- ### 2 Test compliancy with OpenAIRE

To continue you need to make your repository OpenAIRE compliant. To do this, you need to implement the [OpenAIRE Guidelines](#). In order to check your repository's compliancy with the OpenAIRE guidelines, we offer you a web [tool here](#).

Below you can find plugins for some of the popular repository platforms.

Engaging Citizens in the fight against corruption : Results of the EU-Project "ALACs (Advocacy and Legal Advice Centres): Promotion of Participation and Citizenship in Europe"

Author(s): Giannakopoulos, Angelos**Project(s):** ALACS

Description: The paper aims at presenting first results from the EU-funded project entitled "Promotion of Participation and Citizenship in Europe through the Advocacy and Legal Advice Centres (ALACs) of Transparency International" supported by the European Commission under the Seventh Framework Programme. The research project is a joined venture between the Transparency International Secretariat and a team of scholars based at the universities of Konstanz, Duisburg-Essen and Warwick. ALACs have become over the last years an important instrument within the frame of the so-called International Anticorruption Regimes. ALACs enable direct engagement of citizens in the fight against corruption. They empower both victims and witnesses of corruption and provide channels for their grievances. The paper provides first of all insights into history, structure and function of ALACs as an important anti-corruption tool. By doing so, the paper comparatively focuses on how ALACs translate concerns of ordinary citizens on corruption cases into actions for systemic (legal, administrative and institutional) anti-corruption improvements through case and public advocacy.
